## **DFB Quantum Cascade Lasers** (pulsed QCL): 6000 nm - 14000 nm

#### WAVELENGTH

760–830 nm 830–920 nm 920–1100 nm 1100–1300 nm 1300–1650 nm 1650–1850 nm 1850–2200 nm 2200–2600 nm 2200–2600 nm 2800–4000 nm 4000–4600 nm 5300–5800 nm 5300–5800 nm

nanoplus Distributed Feedback Lasers **(DFB)** are specifically designed for high-precision gas detection using tunable diode laser absorption spectroscopy **(TDLAS)**. Our devices operate **reliably** in more than 50,000 installations worldwide. For 25 years nanoplus has set the standard for DFB laser technology and is the only manufacturer routinely providing DFB lasers at **any wavelength**.

### **Key features:**

- MONOMODE
- PULSED
- ROOM TEMPERATURE
- MODE HOP FREE TUNING

Overgrowth-free DFB device processing

Any **custom wavelength** is possible: You tell us what you need and we deliver it. With our patented DFB technology we design any wavelength **between 760 nm and 14 μm.** 

Our excellent **spectral purity** is characterized by a large side mode suppression ratio **(SMSR)** of **> 35 dB**, giving your system a low signal to noise ratio against crossinterference.

A **narrow linewidth below 3 MHz** guarantees ultra-precise scanning of the absorption line feature. The **high output power** of **several mW** yields a stronger signal and increases your measurement precision.

#### Fast and wide wavelength

**tuning** is required for in situ systems. Most customers use a scan rate of 10 kHz and benefit from our very **large tuning coefficient.** 

### "Do not change your ideas, let us deliver a laser that fits your application."

We offer **various packaging options**, e.g. several free space housings including TEC and NTC, fiber coupling, **collimation** and **custom designs**. What do you require?

If you require **custom specifications**, please contact us. Nearly 80 % of our devices are more or less customerspecific. As nanoplus is a **fully vertically integrated company**, we control the entire process chain from design to packaging.

# Typical Specifications: 6000 nm - 14000 nm (pulsed)

This data sheet reports performance data of a **sample DFB QCL at 9800 nm in pulsed operation**, which is representative for the entire wavelength range.

Typical mode hop free tuning of a pulsed nanoplus

#### Typical room temperature spectrum of a pulsed nanoplus DFB QCL at 9800 nm
