

GSM-E Series Datasheet

- 40 mm and 60 mm centre of rotation options allow for two axes of motion about a common centre of rotation
- 30 N load capacity
- Low profile, small footprint
- Encoder position feedback with slip/stall detection and automatic recovery
- Designed for use with an X-MCB1 Series stepper motor controller or any 2-phase stepper motor controller

Overview

Zaber's GSM-E Series devices are motorized goniometers with high thrust and speed capabilities in a compact package. They are stepper motor driven positioning goniometers designed to interface with our X-MCB1 or X-MCB2 controller, offering high resolution daisy-chainable operation. These stages are excellent for applications where a small profile is required. They can mount to a flat surface or stack together to share a common centre of rotation for two axes of angular motion.
